## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 17-24 and 28-30, drawn to a method of making an anti-paratopic antibody, classified in class 435, subclasses 326 and 332.
- II. Claim 25, drawn to anti-paratopic antibodies specific to any agent, classified in class 530, subclasses 387.1 and 388.2.
- III. Claims 26 and 27, drawn to anti-paratopic antibodies specific to HIV, classified in class 530, subclass 388.35.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II, III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the method can be used to make different antibodies, such as those in groups II and III.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the different anti-paratopic antibodies are structurally unrelated, which enables each antibody to bind to different substrates, pathogens or agents.

Art Unit: 1648

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter, restriction for examination purposes as indicated is proper.

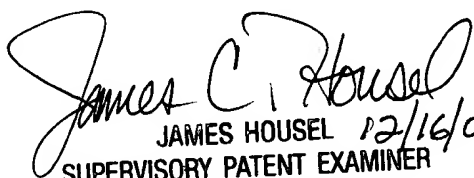

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
